

Electric Insulating Tapes

Safe insulation and marking during electrical installation

▶ VDE-tested according to DIN EN 60454-3-1 Type 5.

Your advantages:

- Safety thanks to tested properties.
- Up to 9 kV disruptive strength.
- Hardly flammable.

▶ Safe, easy use.

Your advantages:

- Tear-proof and resistant to ageing.
- High flexibility and adhesive strength.

▶ Following assembly, consistently positive material properties, even at changing temperatures.

▶ Largely resistant to diluted acid and caustic solution.

Colour	Width in mm	Thickn. in mm	Roll in m	Art. No.	P. Qty.
black	15	0,15	10	0985 101	10
white				0985 102	
red				0985 103	
brown				0985 104	
blue				0985 105	
yellow				0985 107	
green/yellow				0985 109	
grey				0985 109 1	
green				0985 109 2	
black				30	

Applications:

For insulating, marking electrical cables and securing cable harnesses etc.

Note:

Protect tape from exposure to direct sunlight.

Technical data:

Chemical basis	Acrylate, soft PVC foil
Thermal stability	+0°C to +90°C
Disruptive strength	9 kV
Minimum shelf life	24 months

This information is only a recommendation based on our experience. Check material compatibility on a non-visible area if necessary.

Assortment, sorted by colour Art. No. 0985 100

Contents:
10 rolls = 2x black, 2x white, red, brown, blue, yellow, green/yellow, grey
