

Parallel Dispenser

Adhesive tape dispenser for precise adhesion of 19 mm wide masking tapes

Art. No. 0985 053

P. Qty. 1

- ▶ Precise adhesion of the tape.

Your advantage:

- Masking tape can be adhered parallel to the work edge. This prevents „curves“ from forming in the tape during application.

- ▶ Adjustable space-keeper.

Your advantage:

- For work with silicone and any other masking work, precise spacing down to the millimetre (scale up to 17 mm) can be set (on both the right and the left of the dispenser).

- ▶ Easy and secure setting of the space-keeper.

Your advantage:

- The space-keeper is screwed on with an integrated, hexagon spanner which cannot be lost and which provides a secure setting.

- ▶ Housing made of sanded stainless steel.

Your advantage:

- The dispenser is very sturdy and stainless.

Applications

For precise masking of 19 mm wide crepe masking tape with painting, varnishing and plastering work on level surfaces (e.g. doors, windows, baseboards etc). Also suitable for masking tasks in silicone and wallpapering work.

Notes

- Adhesive tapes with a width greater than 19 mm cannot be applied with the parallel dispenser!
- The parallel dispenser is not suitable for applying masking tape on/in motor vehicles!
