

HOT PROTECTIVE WAX

Creates a protective layer

- Protects the vehicle surface against corrosion, salt and UV radiation.
- Rainwater simply runs off.
- Makes it easier to remove dirt.
- Delays resoiling

High-quality components ensure optimum sheen.

- Cared-for, like-new appearance.

AOX-free and silicone-free.

pH value in concentrate: 4.5

Free of mineral oils and hydrocarbons

Degrades easily in accordance with OECD*.

Does not hamper the effectiveness of light fluid separators.

* OECD = Organisation for Economic Co-operation and Development

Areas of application:

For protecting vehicles in self-service car washes and in car washes with hot-water spraying equipment.

Use:

In car washes: Add an undiluted dose to the hot wax spraying system.

User concentration: approx. 0.2 %.

In high-pressure equipment/self-service car washes:

Stir 1 part hot protective wax into 9 parts water.

Usage temperature: approx. +70°C to +80°C.

Spray the product onto the cleaned and still wet vehicle. Rinsing with cold water improves the run-off and the sheen.

Note:

Store in a frost-free location. Avoid overdosing!
