

Rust remover Rost Off Special

High-performance rust remover with food registration (NSF - H1)

Contains synthetic oil

Optimum creeping and lubricating effect

Extremely high degree of capillary activity

- Outstanding creeping properties ensure extremely fast penetration of rust and corrosion
- The optimum effect begins shortly after spraying

NSF H1-registered

- Can be used in areas in which food is processed or stored
- However, direct contact with food by the product must be prevented

Excellent material compatibility

In contrast to many conventional rust removers, it does not attack rubbers or plastics.

Optimum protection against corrosion thanks to corrosion protection additives

Details/Application

For loosening extremely rusty and oxidised screw and joint connections on machinery, assemblies and devices, preferably in the food and beverage industry.

Instructions

Shake the can well before use. Spray the desired location from a distance of 15 to 20 centimetres and at an application temperature of 15 to 25° C. Leave to work for a short time. For stubborn connections, repeat the application process and extend the working time where necessary.

Proof of performance

NSF = internationally recognised organisation for the supervision and registration of products used in the food industry.

Notice

- Immediately remove excess material or splashes on sensitive and painted surfaces
- Avoid adding an excessive amount of oil to parts.
- Resin- and acid-free
- Silicone-free
