Chemical basis	Surfactans
Shelf life from production/conditions	36 Month/frost-free storage area

Art. no. 0893 117 013

P. Qty.: 1 / 12

Details/Application

Can be used on all acid-resistant surfaces such as sinks, fittings, plastic surfaces, shower and bath tubs, toilets/urinal basins, wall and floor tiles.

Instructions

- Maintenance cleaning: Dilute 0.5-1% (40-80 ml/8L cold water).
- Basic cleaning: Dilute 2% (160 ml/8L cold water).
- In case of extreme soiling or heavy lime deposits, apply undiluted and then wipe with clean water.

Notice

Always dilute non-acid-resistant joints before cleaning. After cleaning with floors, walls and inventory, always go over with clean water. Do not apply sanitary power cleaner to marble, enamel or surfaces sensitive to acids. Test material compatibility on an inconspicuous area.
