

Rim cleaner

Highly effective, acid-free special cleaner for all steel and alloy rims and hubcaps.

Quickly and easily removes even the most stubborn dirt, such as burnt-on brake dust, rubber and tar residues and other road contamination. The gentle formula does not attack the rim surface or wheel bolts. The product is very economical to use.

Shelf life from production	24 Month

Details/Application

Steel and light metal rims and hubcaps

Instructions

Spray the rim evenly from a distance of between 15 and 30 cm. Allow the cleaner to work for about 5-10 minutes. Remove dirt using either a damp sponge or a wheel brush and rinse thoroughly with a water jet. If necessary, wash as usual or put through a wash tunnel. Do not allow the product to dry on.

Notice

Do not apply on hot surfaces or in direct sunlight. The recommended working temperature is 10°C-25°C. Protect from frost.
