Art. no. 5964 764 004

P. Qty.: 1

Details/Application

Car air conditioning system

Notice

The valve inserts must be replaced at each air conditioning service or when maintenance work is carried out on an air conditioning system. This is because debris from the compressor or other components may build up in the valve inserts as a result of activities such as draining and refilling, and this can cause leaks. Please use our range of protective caps and valve inserts when carrying out this type of work.

Contents for art. no. 5964 764 004		
Designation	Art. no.	Quantity
Air conditioning tchnlgy, veh. access., others		12
O-ring For vehicle air-conditioning systems 6.7 x 1.40 mm		10
